

## Elcometer 3120 Shore Durometer

Elcometer 3120 Shore Durometer

The Elcometer 3120 range of durometers is widely used to test the hardness of soft materials.

A round point indents the material under a fixed force spring and the hardness is displayed on the dial.

The instrument can be either hand held or fitted to an optional stand for increased repeatability.

The Elcometer 3120 range of Shore Durometers encompasses a number of hardness values. Please refer to the table below.

### Hardness Testers

Improved mechanical resistance is part of many quality requirements. One important criteria for assessing this feature is hardness.

Depending on the requirements there are various methods for testing hardness. Some are dedicated to characterise coatings and others are more suitable for testing bulk materials such as metals, plastics, rubber or elastomers.

Elcometer manufacture and supply a wide range of instrumentation designed for the hardness tests most frequently used in the industry – these include pendulum, scratching, indentation or rebound measuring methods.

Can be used in accordance with:

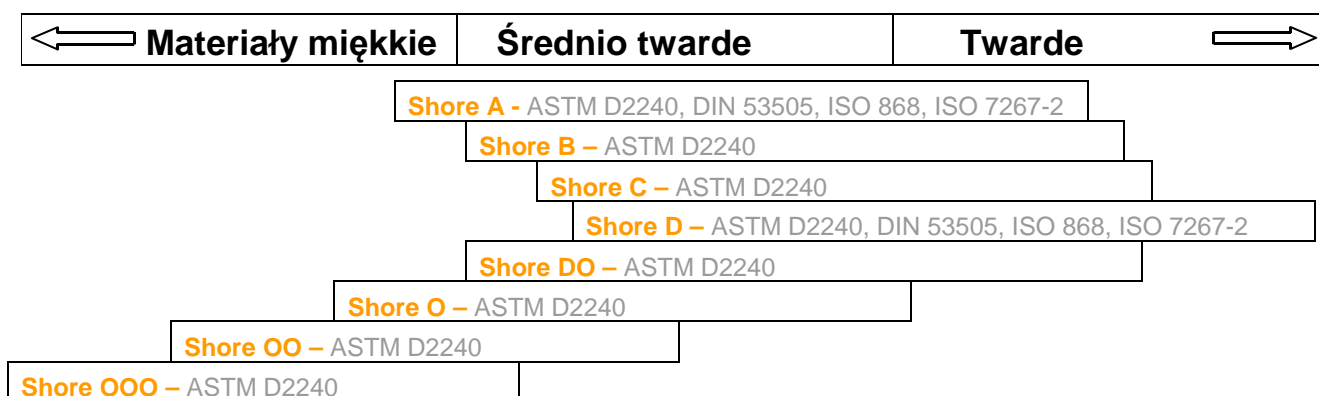

- ASTM D2240
- BS 7442-3.2
- DIN 53505
- FIAT 50411
- ISO 868
- ISO 7267-2
- NF T51-123
- NF T51-174

### At a glance:

Standard test for material hardness.

Easy to use with immediate results.

Wide range available depending on the material to be tested.

TECHNICAL SPECIFICATION	
<b>Dimensions</b>	50 x 50 x 110mm (1.9 x 1.9 x 4.3")
<b>Weight</b>	300g (10.58oz)
<b>Part Numbers</b>	See table below
<b>Packing List</b>	Elcometer 3120 Shore Durometer, check piece (Shore A & D models only) and operating instructions

PART NUMBERS		
Description	Part Number	
	Without Certificate	With Certificate
Elcometer 3120 Shore Durometer A	K0003120M001	K0003120M015
